First Time in India
MOST COST EFFECTIVE
LAUGHING GAS UNIT

SAFEST MACHINE

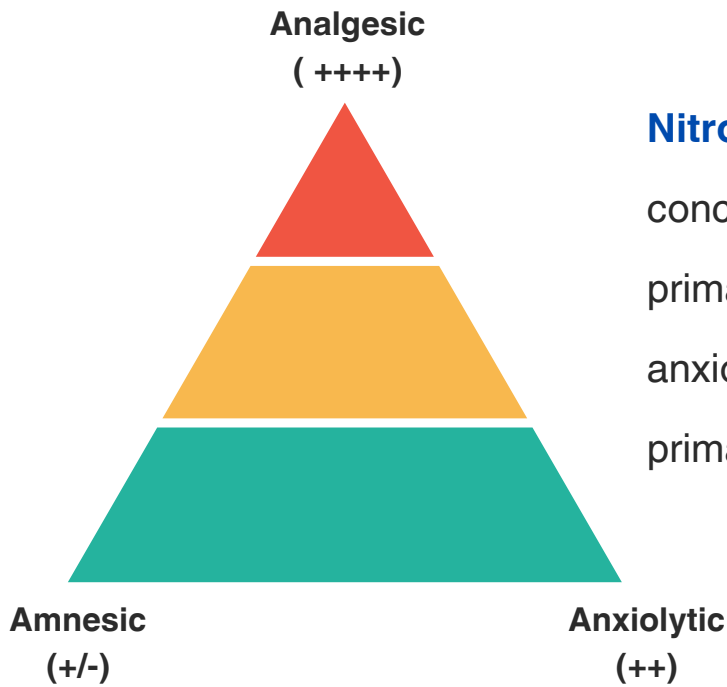

NOX - The Nitrous Oxide Delivering System

ANXIOLYSIS A level of sedation in which a person is very relaxed and may be awake. The person is able to answer questions and follow instructions. Anxiolysis is caused by special drugs and is used to help relieve anxiety during certain medical or surgical procedures also called minimal sedation.

ANALGESIA Loss of sensation of pain that results from an interruption in the nervous system pathway between sense organ and brain.

Nitrous oxide (N_2O) at concentrations below 50% is primarily utilized as an analgesic and anxiolytic agent rather than as a primary sedative.

WE

CLAIM,

N_2O IS MORE ANALGESIC THAN SEDATIVE.

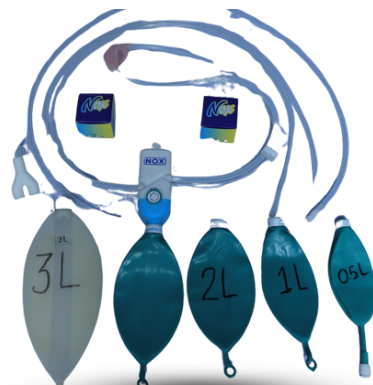

IN DENTISTRY WE NEED ANALGESIA & ANXIOLYSIS NOT SEDATION. SO, WHY TO PROMOTE AN OXYMORON CONSCIOUS SEDATION. N_2O OFFERS A CALMING SOLUTION FOR PATIENTS OF ALL AGES

NOX Sterility of Equipment

1. Circuit & mask both autoclavable

2. Only circuit which can be used with HME filter (anti-bacterial. anti viruses) to avoid Cross Contamination

3. Dry sterilization is also possible with alcohol wipes

4. ETO sterilization is also possible

Three Major Challenges in Dental Patient

1. Fear of Pain

2. Apprehension (fear of unknown)

3. Anxiety

N₂O easily manages this to make your Patient Comfortable and Pain - Free Experience.

NOX as a Day-Care Tool

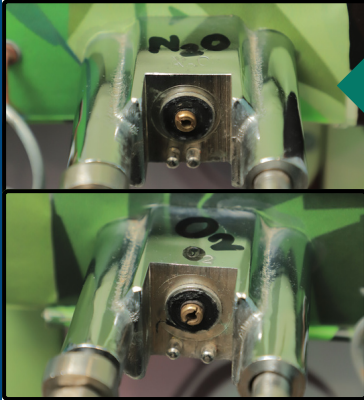

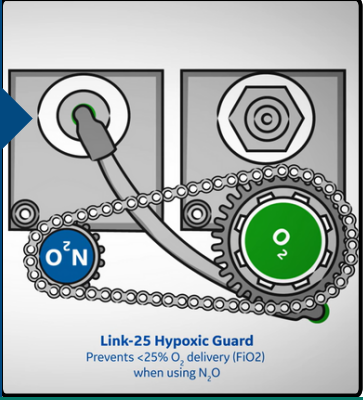

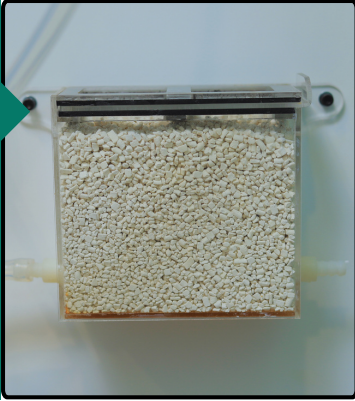

- Excellent analgesia. (Pain-free experience)
- Titrable calmness (Anxiolysis)
- Fastest onset and Rapid recovery
- No- residual effect. (Immediate discharge of Patient is possible)
- Suitable for all age patient
- **Lowest operational cost with NOX Machine**
- Can be used with minimal pre-procedure instructions
- No major Contraindications can be used in highly morbid patient too

Fail-Proof Safety Features

We have integrated a wide range of features into our NOX systems to provide complete control for the healthcare team, thereby ensuring the utmost safety for patients undergoing procedures.

These features include:

	OXYGEN- FAIL SAFE SYSTEM In an oxygen supply failure, nitrous oxide administration will be stopped, as it requires oxygen.		STANDARD JOINT OR GAS PIPELINE a. Pin index Safety System (PISS) b. Diameter index Safety System (DISS) Customizable as per your need.
ADJUSTABLE PRESSURE LIMITING (APL VALVE) This machine offers unique positive pressure ventilation for respiratory patients, a feature absent in other devices.		HYPOXIC GUARD NOX is designed with an N ₂ O limiter. The maximum amount of N ₂ O that NOX can deliver is 75%.	 Link-25 Hypoxic Guard Prevents <25% O ₂ delivery (FiO ₂) when using N ₂ O
	OXYGEN FLUSH An integrated Oxygen flush button on the machine provides an immediate flow of 25 LPM of Oxygen to the patient.		AUDIBLE OXYGEN ALARM When your oxygen pressure drops, an alarm will sound to alert you before cutting off the N ₂ O supply.
SCAVENGING SYSTEM The most efficient scavenging system protects doctors and paramedics while minimizing CO ₂ emissions.		NON-REBREATHING VALVE The machine operates on a rebreathing principle, preventing CO ₂ poisoning and cutting gas consumption by 50%.	

Technical Specifications

NOX ADVAITA

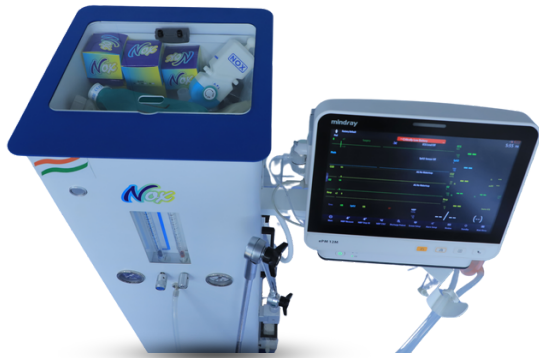

Oxygen	Maximum flow 10L/min.
N ₂ O	Maximum flow 12L/min.
Dimension	(H*W*O)
Weight of machine	=50KG
Precisely calibrated flow	±100 ml/min
N ₂ O	0 - 75%
O ₂	25% - 100%
Oxygen Flush	(>25L / min)
Rebreathing bag. Sizeable. able to patent weight. to decrease gas wastage.	(0.5L / 1L / 2L / 3L)
Adjustable mask size	(S / M / L)

- ✓ Hypoxic guard flow meter (ISO/CE certified)
- ✓ Useful in both Cylinder & central-supply
- ✓ Equipped with Scavenging System
- ✓ Equipped with all safety standard Safety mechanism
- ✓ Only machine with Storage
- ✓ Positionable rebreathing bag to monitor respiration at Consultant's eye level

NOX – Signature Aspects

Monitor Stand

**Storage Compartment
on Top**

Rapid Titration Circuit

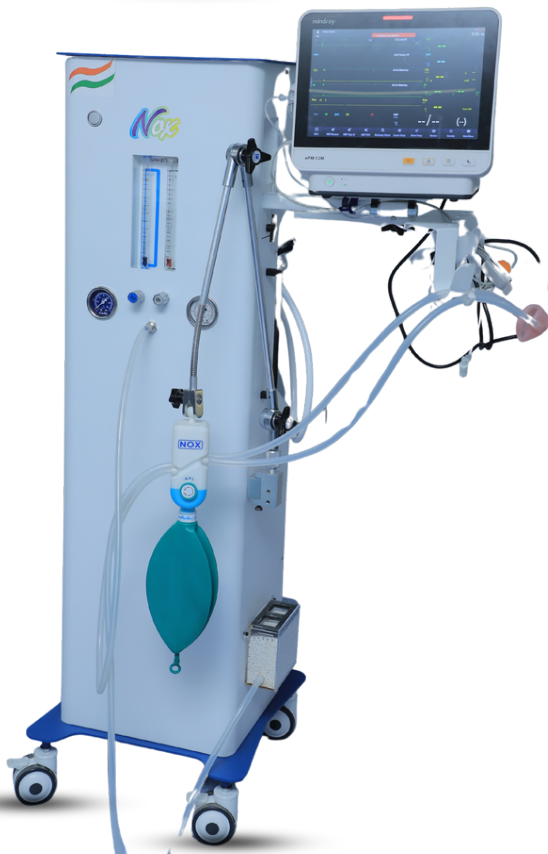

Audible Oxygen Alarm

**Open Active Scavenging
System with CO2 Absorber**

**Adjustable Rebreathing
Bag Arm**

NOX – Applications

**Pediatric
Anesthesiologist**

**Cosmetic & Skin Department
(Plastic Surgery)**

Dentistry

**Gastro-Intestinal
Endoscopy**

Obstetrics
